

The social value of the Web is that it enables human communication, commerce, and opportunities to share knowledge.

One of W3C's primary goals is to make these benefits **available to all people**, whatever their hardware, software, network infrastructure, native language, culture, geographical location, or physical or mental ability.

Easy Accessibility improvements using React:

Your everyday ESLint can help you!

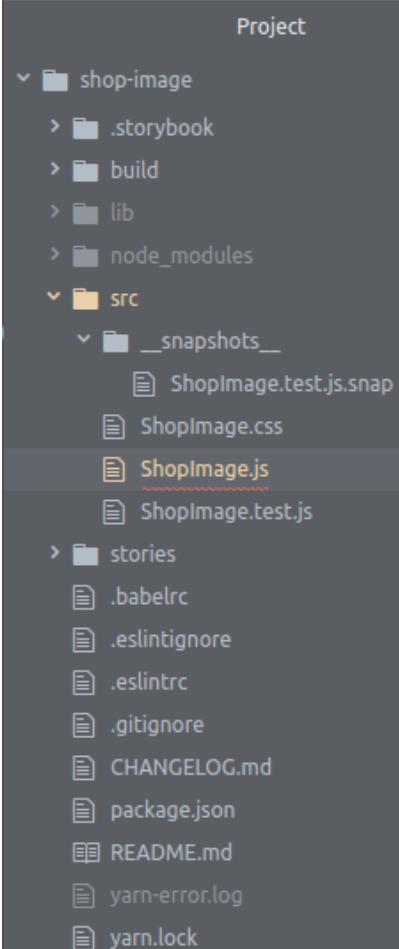

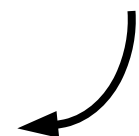

[evcohen/eslint-plugin-jsx-a11y](https://github.com/evcohen/eslint-plugin-jsx-a11y)

included in Airbnb ESLint default config

[airbnb/javascript/eslint-config-airbnb](https://github.com/airbnb/javascript/tree/master/eslint-config-airbnb)

Just add it to your ESLint config...

right in your editor ☺

```
20   · · isPendingChange,
21   · · zoomSecondaryOnHover,
22   }) => {
27
28   · · · · <img
29   · · · ·   className={styles.primary}
30   · · · ·   src={primary.url}
31   · · · ·   srcSet={buildSrcset(primary.set)}
32   · · · · />
33
34   · · · · {secondary &&
35   · · · ·   <img className={secondaryClassName}
36   · · · · }
37   · · · · {isP
38   · · · ·   <S
39   · · · · }
40   · · </div> text)
41   };
42
```

```
</div> text)
```

```
};
```

```
42
```

```
43 ShopImage.propTypes = {
```

```
44   primary: PropTypes.shape({
```

That's all! That's easy.

It's what I did this week-end :)

and it's my first contribution to accessibility at

I hope it can be yours too,
whatever project you contribute to!
